Licensing Microsoft® SQL Server is a comprehensive, 1-day software licensing training course dedicated to the licensing of Microsoft SQL Server.

## Key Benefits

- ✓ Make informed licensing decisions that are strategic and cost optimised.
- ✓ Identify and mitigate compliance risks and avoid the common mistakes that expose organisations to licence deficiencies.
- ✓ Make intelligent use of your existing SQL Server licences.
- ✓ Ensure you have an optimised set of SQL Server licences that cover your on-premises, cloud and hybrid IT environments.
- ✓ Become your organisations in-house SQL Server licensing expert!

## SQL Server Licensing is Complex. We can Help...

Microsoft SQL Server usage is governed by some of Microsoft's most complex licence terms. It is also one of the most common products for which licence deficiencies are identified during a licence audit.

This course will teach you everything you need to know to avoid compliance risks, make informed purchasing decisions and gain maximum value from your SQL Server software licence investments. The course covers the licence terms relating to running SQL Server workloads in on-premises environments, and also covers the licence terms applicable to running SQL Server workloads in the cloud and how those terms can differ significantly between Azure, AWS and other 3rd-Party cloud environments

### Course Duration:

1-day (8:30am–5:00pm)

### Course Inclusions:

- ✓ Printed Training Materials.
- ✓ Certificate of Course Completion.
